

REMARKS

In response to the restriction/election requirement dated May 2, 2011 Applicants elect, with traverse, Species N illustrated in Figure 15, to which claims 95, 100-103 and 105 apply.

Applicants believe there is no reason to restriction the invention into 18 different species as outlined by the Examiner. Applicants believe it would be reasonable to restrict the application into only three distinct species, based upon the means of activating and deactivating the pedal travel simulator. Therefore, the species groupings would be: one for electromechanical means of activating and deactivating the pedal travel simulator, which is illustrated in Figures 1-4; one for electrohydraulic means of activating and deactivating the pedal travel simulator, which is illustrated in Figures 5-14; and one for pneumatic means of activating and deactivating the pedal travel simulator, which is illustrated in Figures 15-19. Of these groupings the Applicants elect Figures 15-19 to which claims 95-105 can be applied.

Applicants do not believe any fees are due in connection with the filing of this Response. If, however, Applicants are in error and there are additional fees due, including any extension fees, please charge all such required fees to Deposit Account 50-2570.

Respectfully submitted,

/Christine M. Mackiewicz/
